## Other Information

**Kamagra** (Kamagra) will solve the problems of erectile dysfunction of any origin. Active ingredient - sildenafil. It relaxes the smooth muscles of the cavernous bodies of the penis and arterioles. As a result, they dilate and allow blood to completely fill the enlarged cavity. At the same time increases blood circulation, activates the process of filling. You receive qualitative erection. But this happens only on the background of sexual stimulation, when there is sexual arousal.

The effect of Sildenafil provides not only high quality but and prolonged erection because it inhibits the production in the body of the substance PDE-5, which stimulates the flow of blood from the penis. Sildenafil in any case not substitute natural processes of sexual intercourse. It only encourages them. The first signs

of the impact of substances on the body appear after 40-50 minutes after ingestion. Ongoing impact - about four hours. About the quality of the tools, its effectiveness can be judged by the opinions of men who have experienced it for yourself.

Dosage and release form of the drug, in contrast to the original means Viagra, a diverse and quite capable to satisfy the most different needs.

### **Indications for use**

The use of means shown adult men suffering from disorders erectile function. The drug can be used in preventive purposes or in order to improve the quality of sexual intercourse, but in small doses.
